COMPLETE BEVERAGE PACKAGE PRODUCTION LINE

JIANGSU EQS MACHINERY CO.,LTD

ABOUT US

Our products have been exported to more than 100 countries and regions, more than 500 customers & users such as Mengniu dairy, Yili dairy, Master Kong, Nongfu Springwater, PANPAN, Coca Cola, Snow Beer, Red Bull, Jianli-bao, C'estbon, Nestle Waters, Lotte, Malee Safeguard, Kinsell, Perrier, Evian, Wahaha, New Hope, Hengshun, LEE KUN KEE, Tuborg Absolut.

ACUQA, Walch, HPGC, East Roc, Unilever and so on, More than 800 of production lines have been successfully accepted and put into production.

Professional Products and Solutions Support

Remote Service and Fast Maintenance

The Entire System Training Services

Perfect After-sales Service

01

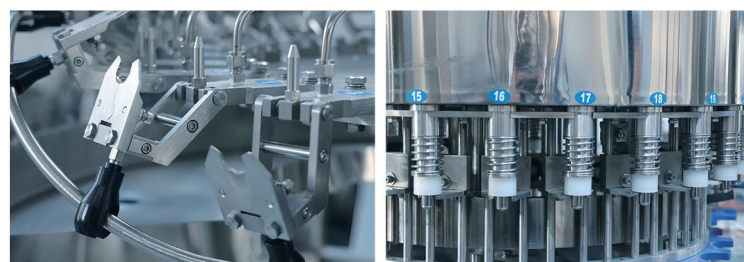

WATER FILLING SERIES

Water Filling Machine

This Water Filling Machine is used to produce polyester bottled mineral water, purified water, drinking water beverage machinery and other non-gas beverage machinery. This Water Filling Machine can finish all the process such as rinsing bottle, filling and sealing, it can reduce the materials and Outsiders touch time, improve the sanitary conditions, production capacity and economic efficiency.

This series of equipment integrates washing, filling and sealing, which is suitable for the production of non-alcoholic beverages such as pure water and mineral water in PET bottles. Using gravity filling principle, grasping cap technology, magnetic screw cap head, screw cap moment is stepless adjustable. Output 5000~24000BPH for users to choose.

Model	Production Capacity(500ml)(B/H)
CGF8-8-3	2000
CGF14-12-4	4000-5000
CGF18-18-6	8000
CGF24-24-8	12000
CGF32-32-10	16000
CGF40-40-12	18000-20000

02

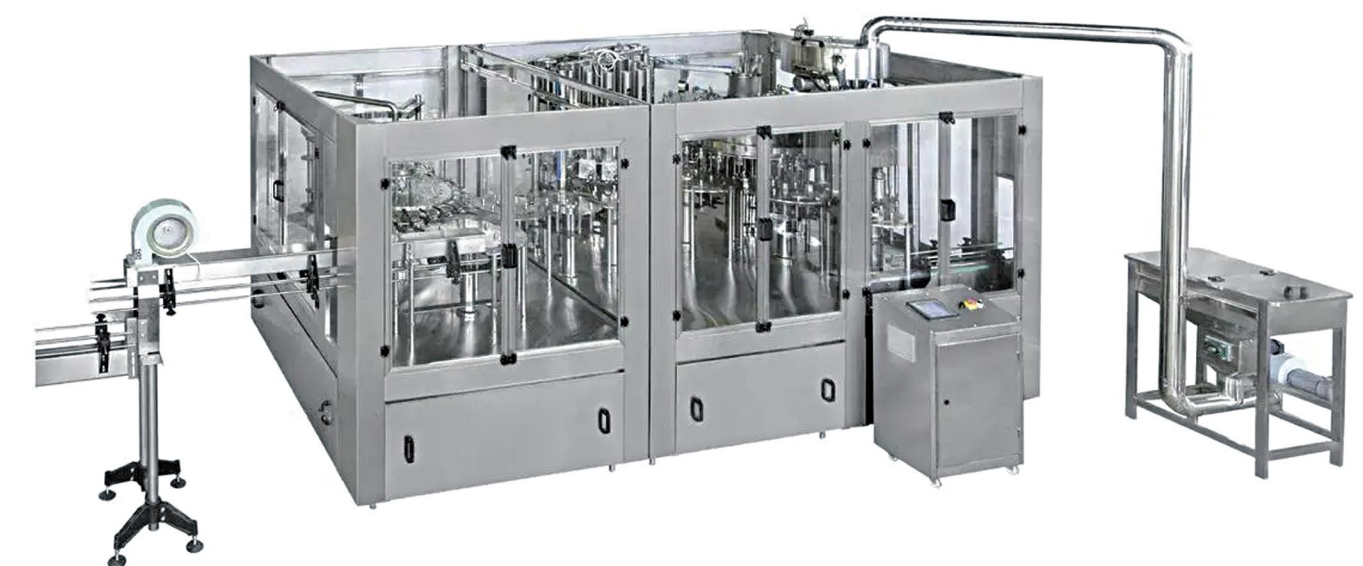

CARBONATED FILLING SERIES

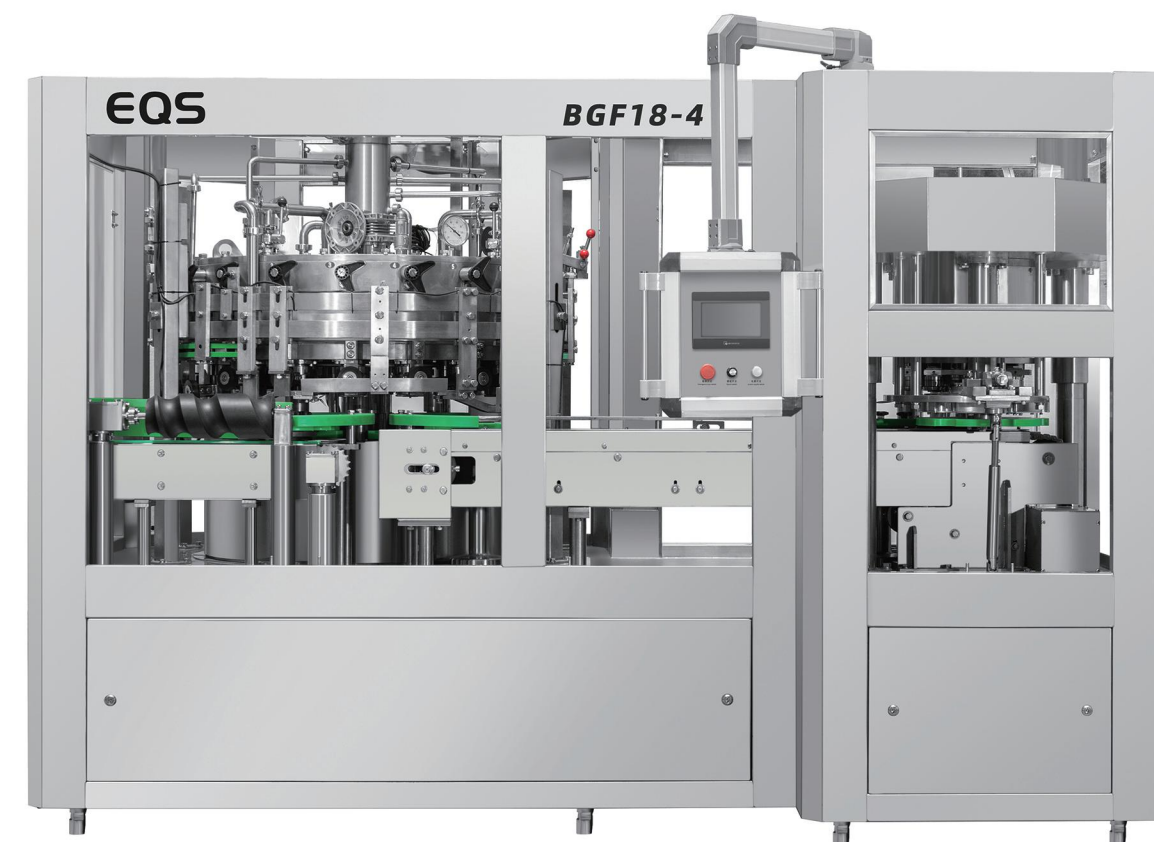

Carbonated Filling Machine

The machine integrates three functions of bottle flushing, filling and capping to achieve full automation, which can be applied to various bottle types. Using the card bottleneck technology, the bottle change only needs to adjust the conveying chain height, which is faster and less labor. Filling method adopts a new type of micro-pressure filling, filling speed is faster and more stable. The host adopts advanced PLC programming automatic control, and the key electrical components are all internationally renowned brands. The whole machine design is scientific and reasonable, the output is high, the failure rate is low.

Model(PET/Glass)	DCGF 14-12-4	DCGF 18-18-6	DCGF 24-24-8	DCGF 32-32-10	DCGF 40-40-12
Rinsing Heads	14	18	24	32	40
Filling Heads	12	18	24	32	40
Capping Heads	4	6	8	10	12
Capacity(BPH)	2500	4000	6000	9000	14000

Model(CAN)	DCGF 4-4-1	DCGF 18-1	DCGF 18-4
Rinsing Heads	4		
Filling Heads	4	18	18
Sealing Heads	1	1	4
Capacity(CPH)500ML	200-300	2000-3000	6000-9000

03

HOT FILLING SERIES

Hot Filling Machine

Model	RCGF 14-12-4	RCGF 18-18-6	RCGF 24-24-8	RCGF 32-32-10	RCGF 40-40-12
Rinsing Heads	14	18	24	32	40
Filling Heads	12	18	24	32	40
Capping Heads	4	6	8	10	12
Capacity(BPH)500ml	4000	5000	10000	12000	15000

This series of equipment is used for hot filling production of tea drinks, juice drinks and other products. The machine integrates bottle flushing, filling and sealing with scientific and reasonable design and easy operation. It is the preferred production equipment for hot filling drinks. The whole machine adopts the bottleneck suspension process design, and adopts the filling valve lifting, which can meet the technical requirements of hot filling below 95 degrees. The filling action is smooth, fast, high precision, reliable sealing, low material loss and effectively avoid secondary pollution of the bottle mouth. Only need to replace the same amount of parts, can realize the conversion between different bottles using man-machine interface touch screen control, PLC computer control, inverter control and other advanced technology, high degree of automation. The main electrical components of the whole machine are made of internationally renowned manufacturers.

BEER FILLING SERIES

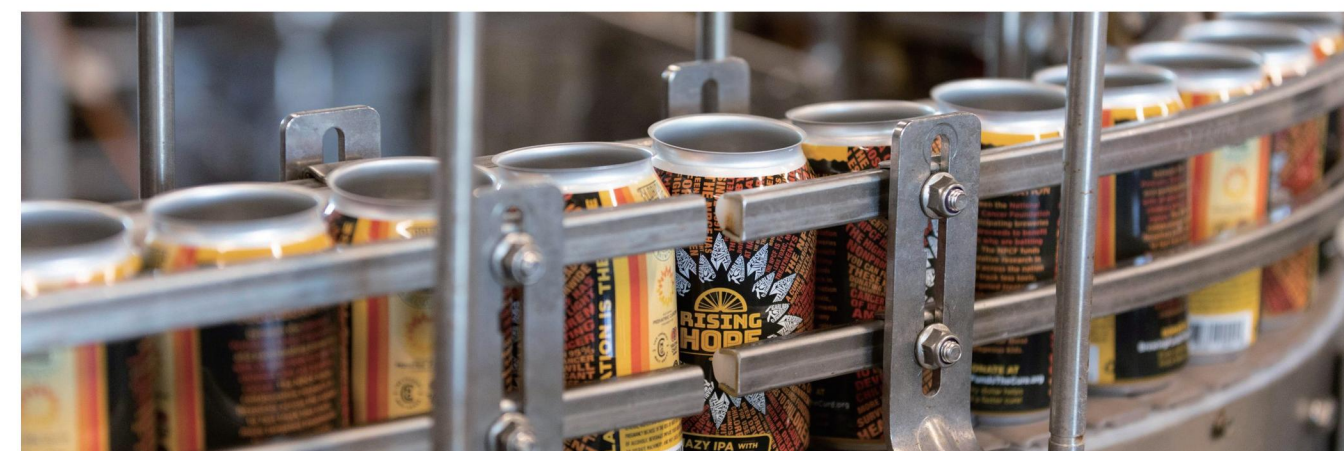

Beer Filling Machine

Model(Glass)	BGF 8-6-1	BGF 14/12/4	BGF 18/18/6	BGF 24/24/8	BGF 32/32/10	BGF 40/40/12
Washing Heads	8	14	18	24	32	40
Filling Heads	6	12	18	24	32	40
Capping Heads	1	4	6	8	10	12
Capacity(BPH)(500ML)	250-500 One Time Vacuum	1000 One Time Vacuum	1500-2000 One Time Vacuum 1000-1200 Twice Vacuum	4000 One Time Vacuum 3000 Twice Vacuum	6000 One Time Vacuum 5000 Twice Vacuum	8000 One Time Vacuum 7000 Twice Vacuum

Model(CAN)	BGF 4-4-1	BGF 18-1	BGF 18-4
Rinsing Heads	4		
Filling Heads	4	18	18
Sealing Heads	1	1	4
Capacity(CPH)500ML	200-300	2000	6000

The high precision mechanical filling valve is adopted, which has the characteristics of no vacuum without bottle.

Open gear combined with gearbox transmission, with clutch device, frequency control equipment to expand the speed modulation range.

This machine has a self-lubricating device, and the lubrication point can lubricate the machine regularly. High efficiency, low noise, long life.

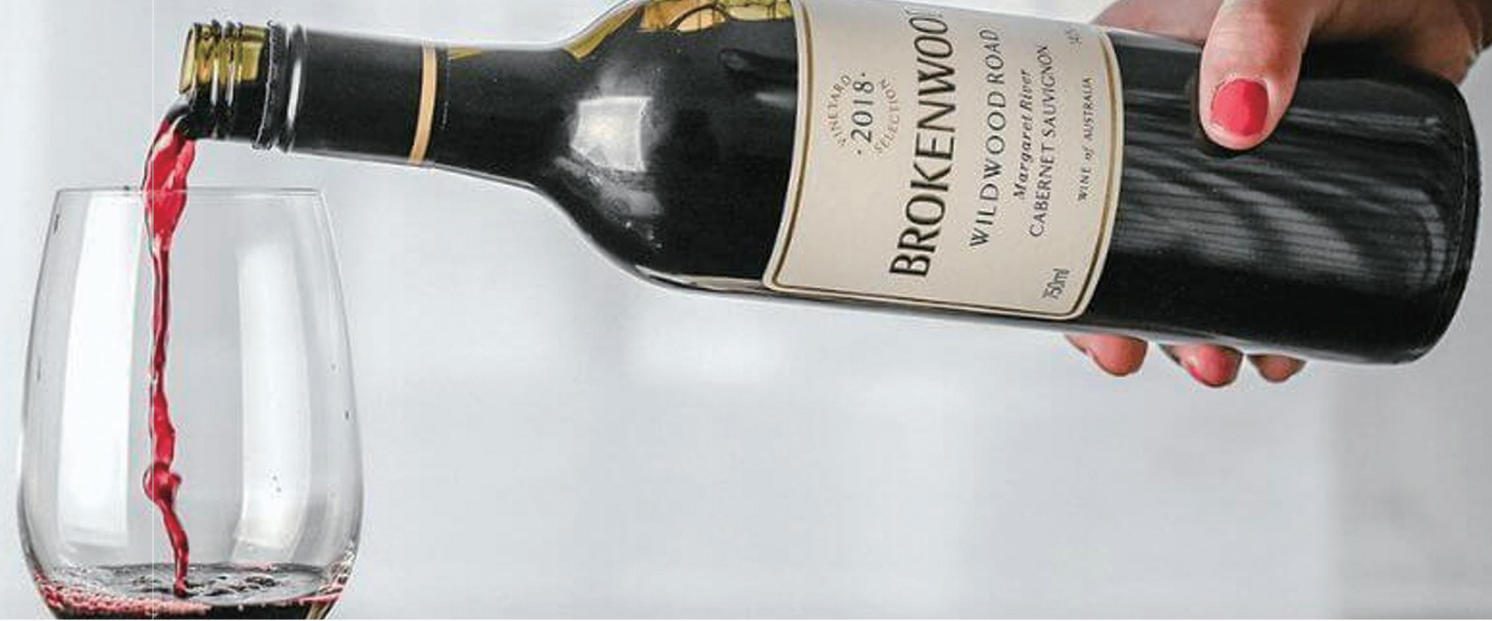

Some parts of the machine can be adjusted to suit different bottle types.

The liquid height in the bottle is controlled by an electronic probe to make the level more accurate.
